

WMS Sales and Watts Water Technologies

Working together

to Transform a Healthcare Facility
into a Safe & Efficient Building!

Today's healthcare design, building & construction industry is faced with a variety of important issues:

- Compliance with regulations & standards
- Need for infection control
- Adherence to sanitation requirements
- Implementation of sustainability initiatives & goals
- Improved building performance & efficiency
- Safety & comfort for patients, staff, and visitors
- Protection for building property & assets

See how **WMS Sales and Watts Water family of companies** can help healthcare designers, builders, contractors, engineers, and facility managers meet these needs.

Solving for Safety, Comfort, Control & Sustainability
